

Corner

Opening and Closing Applications

To open an application, do one of the following:

- Click Start, Programs, then click to launch an application; or,
- Double-click on shortcut icon on your desktop to launch an application.

To close an application, do one of the following:

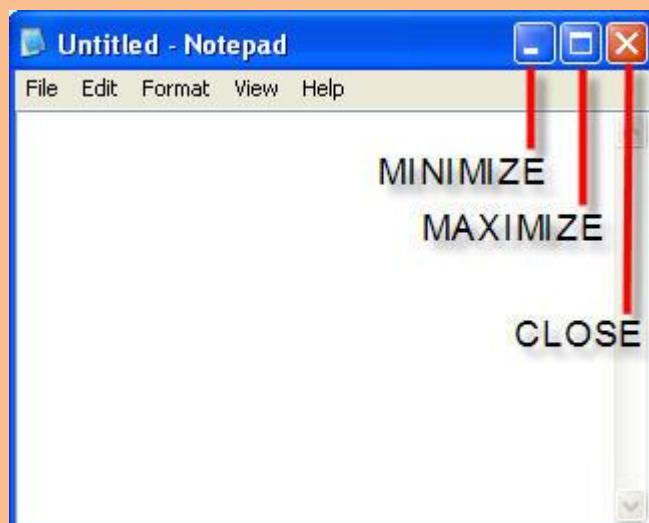

- Click on the "X" icon on the upper right corner of the application; or,
- Click on the Control Menu Box (upper left of application window), then click Close.
-

Minimizing and Maximizing

After opening applications in Windows, you may need to minimize certain applications on your screen while you are not using them. Minimizing an application window will still keep the application open. For all open applications, the program name along with an accompanying icon will be displayed on the Task Bar at the bottom of your screen. To return to a minimized application, merely single click on the icon on the taskbar at the bottom of the screen.

Minimize Button: Single clicking on the minimize button will reduce your window to an icon, which will appear at the bottom of your screen along the Taskbar. Once minimized, you can restore the window to its original size by single clicking on the icon.

Maximize/Restore Button: Single clicking on the maximize button will enlarge your window to its maximum size. You may then restore the window to its original size by single clicking on the maximize/restore button once again.

Switching Between Application's

The window currently in use is referred to as the Active Window. To switch to another window, do one of the following:

- Click on any exposed part of another window to make it the active window; or,
- Click on the appropriate icon on the taskbar at the bottom of the screen to switch to that application; or,
- Press and hold the ALT key down while tapping the TAB key slowly to scroll through applications. When you get to the desired application, release the ALT key to switch to that application.

Notepad vs. WordPad

The Notepad accessory is a simple to use text editor in Windows which allows you create files containing notes, simple lists or any other information. It is available in the Accessories nested menu.

The Wordpad accessory, which is also a free Windows tool available in the Accessories menu, is a bit more advanced than Notepad and can be used to compose simple letters or reports. You may recognize some of Wordpad's features as they are similar to the menus and features in Microsoft Word.

Calculator

The Calculator is another simple-to-use accessory in Windows which allows you perform general mathematical functions. It is available in the Accessories menu.

Printing from Windows Applications

You can print from almost any windows application be clicking File, Print from the application's menu bar. When the Print Dialog Box displays, you can specify whether to print a page, selection or range or pages. Depending on your printer, you can also specifiy to print in draft mode, black and white, or color. Many applications also include a printer icon on the top menu as a quick print selection.

Rebooting vs. Shut-Down

Sometimes it necessary to "reboot" your computer, to clear memory and start-over. To reboot, press CTRL+ALT+DEL together, then select the reboot/restart option to restart your computer. If you are finished using your computer, be sure to shut-down your computer correctly. If using Windows XP, click Start, then click Turn-off Computer. If using Windows Vista, click Start, then select the arrow bar to expand the menu and select "Shut Down".

ICONS - SMALL PICTURES WHICH REPRESENT AN APPLICATION, DIRECTORY OR SHORTCUT.

DESKTOP (WINDOWS THEME) ENCOMPASSES THE ENTIRE WINDOWS SCREEN

START BUTTON
DISPLAYS MENU
FOR SELECTION
OF PROGRAMS

TASKBAR
EACH TIME YOU OPEN A WINDOWS APPLICATION, AN
ICON IS ADDED TO THE **TASKBAR**. CLICKING ON ONE OF
THE ICONS WILL RESTORE/MAXIMIZE THE APPLICATION.

NOTIFICATION AREA
(TIME, ACTIVITY STATUS,
VOLUME, INDICATORS,
ETC.)

MOUSE POINTER - MAY APPEAR AS AN ARROW IF POINTING TO THE ICONS AND MENU BARS, OR AS AN I-BEAM IF EDITING TEXT IN APPLICATIONS SUCH AS MS WORD, OR AS A SMALL HAND WHEN POINTING TO LINKS IN A BROWSER. FROM THE WINDOWS DESKTOP, POINT TO AN ICON AND THEN DOUBLE-CLICK LEFT MOUSE BUTTON TO LAUNCH AN APPLICATION.

Computer Class Test
Please Take your Time!!
Work as a Team!!
